### **HIGHLIGHTS OF MELBOURNE-TITUSVILLE-PALM BAY, FL NATIONAL COMPENSATION SURVEY NOVEMBER 2000**

Workers in the Melbourne-Titusville-Palm Bay metropolitan area averaged \$15.65 per hour during November 2000, according to a new survey released by the U.S. Department of Labor's Bureau of Labor Statistics (BLS). Regional Commissioner Janet S. Rankin reported that white-collar workers averaged \$18.71 per hour and accounted for 58 percent of the workers in the area. Blue-collar employees averaged \$13.35 per hour and represented 20 percent of the workforce, while the remaining 22 percent worked in service occupations and earned \$9.21 per hour. (See table 1.)

The National Compensation Survey (NCS) presents straight-time earnings for occupations in establishments employing 50 or more workers in private industry and State and local governments. The survey excludes agricultural establishments, private households, the self-employed, and the Federal Government. This NCS covered 80 firms representing 76,200 workers in the Melbourne-Titusville-Palm Bay metropolitan area, which includes Brevard County in Florida. Seventy-four percent of those represented worked in private industry.

In the Melbourne-Titusville-Palm Bay metropolitan area, average hourly wages were published for 16 detailed occupations. (See table 1.) Among white-collar workers, computer systems analysts and scientists averaged \$25.63 per hour; drafters, \$16.22; and secretaries, \$12.43. Blue-collar occupations included carpenters earning \$14.68 per hour. In the service occupations, public service police and detectives averaged \$15.70 per hour; maids and housemen, \$6.79; and waiters and waitresses, \$2.32.

The NCS also provides broad coverage of selected occupational characteristics. (See tables 2 and 3.) For example, full-time employees in the Melbourne-Titusville-Palm Bay area averaged \$16.62 per hour and part-timers earned \$6.37. Union workers in blue-collar jobs averaged \$16.77 per hour, while their nonunion counterparts made \$12.33. Private industry workers at establishments employing 50-99 workers averaged \$8.81 per hour and those in establishments with 500 or more employees earned \$21.33.

The NCS is part of a statistical program that will eventually integrate three separate surveys of wages and benefits into one comprehensive compensation program increasing the amount of data available. Data provided by the NCS may be used by businesses for establishing pay plans, making decisions concerning plant relocation, and in collective bargaining negotiations. Individuals may use such data to help choose potential careers. Average rates of pay are also available for levels of work within an

occupation based on knowledge, skill, independent judgement, supervision received, and other factors required on the job.

### **Survey Availability**

Complete survey results are contained in the Melbourne-Titusville-Palm Bay, FL National Compensation Survey November 2000 (Bulletin 3105-50). While supplies last, single copies of the bulletin are available from the Atlanta Information Office by calling 404-331-3415. In addition, data contained in the bulletin are available on the Internet in both text and PDF formats at <http://www.bls.gov/comhome.htm>. Select survey tables can also be obtained from the Bureau's fax-on-demand service in Atlanta by dialing 404-331-3403 and requesting document 9490.

For personal assistance or further information on the National Compensation Survey, as well as other Bureau programs, contact the Atlanta Information Office at 404-331-3415 from 9:30 a.m. to 3:30 p.m. ET.

**Table 1. Mean hourly earnings, (1) all workers: (2) Selected occupations, private industry and State and local government, National Compensation Survey, Melbourne-Titusville-Palm Bay, FL, November 2000 — Continued**

Occupation <sup>3</sup>	Total		Private industry		State and local government	
	Mean	Relative error <sup>4</sup> (percent)	Mean	Relative error <sup>4</sup> (percent)	Mean	Relative error <sup>4</sup> (percent)
<b>Service</b> —Continued						
Cleaning and building service .....	\$8.41	12.1	\$8.41	12.4	—	—
Maids and housemen .....	6.79	5.0	6.79	5.0	—	—
Janitors and cleaners .....	10.65	14.0	—	—	—	—
Personal service .....	7.89	10.0	7.63	12.3	—	—

<sup>1</sup> Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

<sup>2</sup> All workers include full-time and part-time workers.

<sup>3</sup> A classification system including about 480 individual occupations is used to cover all workers in the civilian economy.

<sup>4</sup> The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around

a sample estimate.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria, and n.e.c. means not elsewhere classified. Overall occupational groups may include data for categories not shown separately. IN THIS SURVEY, THE NONRESPONSE RATE FOR ALL INDUSTRIES AND PRIVATE INDUSTRY EXCEEDED REGULAR SURVEY STANDARDS FOR PUBLICATION. ACCORDINGLY, USERS SHOULD INTERPRET THESE RESULTS WITH THIS LIMITATION IN MIND.

<sup>1</sup> Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

<sup>2</sup> A classification system including about 480 individual occupations is used to cover all workers in the civilian economy.

<sup>3</sup> Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35-hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40-hour week is the minimum full-time schedule.

<sup>4</sup> Union workers are those whose wages are determined through collective bargaining.

<sup>5</sup> Time workers' wages are based solely on an hourly rate or salary; incentive workers are those whose wages are at least partially based on productivity payments such as piece rates, commissions, and production bonuses.

<sup>6</sup> The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria. IN THIS SURVEY, THE NONRESPONSE RATE FOR ALL INDUSTRIES AND PRIVATE INDUSTRY EXCEEDED REGULAR SURVEY STANDARDS FOR PUBLICATION. ACCORDINGLY, USERS SHOULD INTERPRET THESE RESULTS WITH THIS LIMITATION IN MIND.
